Functionalities of Gum Arabic

- Compatibility and easy use – no odor or taste, pH-stable and 100% water soluble
- Encapsulation agent – as a protection colloid it reduces flavor compound loss
- Emulsifier and suspension agent – for short- or long-term stabilisation
- As a carrier it enables high flavor load
- Flavor retention agent – controlled release and enhanced mouthfeel
- Multifunctional use – a natural and sustainable “all in one” option

Applications

- Citrus, savoury or sweet compounds, multi-dimensional flavors
- Aroma / scents or functional formulations
- For liquid products, spray-dried, fine powdered or agglomerated flavors
- Versatile use for different microcapsule-techniques
- Suitable for oil-soluble or water-soluble systems
for beverage, food, diary, confectionery, health or personal care use
